Prevention and safety assistant
IND, Fleurus
2013 - 2014

High Secondary Education Certificate
Audio Visual, GPH
2004 - 2012

Experience

Software Engineer - MobileXpense (August 2017 – now)

This is my first job. It consist in several things :
- **Managing** Indian team
- Perform tickets from the support, and **deliver it on SLA**[1].
- **Code reviews**
- **Implement new things** requested by the customer.
- Speaking with colleagues and customer **only in English.**

I've also earned a deep soft skills knowledge, and tools like **Jira**, **Zendesk** or **SVN**.

Student Developer – xFive (July 2017)

This work follows my internship. My colleague and I fixed the latest bugs. We've **improved some algorithms** and add small modifications to our 15-week-stage-project.

Trainee - Microsoft Innovation Center (February 2017 - May 2017)

With a colleague, we created an **ASP MVC 5** and **JavaScript** a **graph building tool of nodes for resolution of complex problems**. Though very challenging, this project was incredibly interesting. We used the Vis Js **JavaScript** library to manage networks. **SCRUM, GIT** and **Azure** were also used. It was very helpful to maximize our value.

Student Developer - Express Desk (Summer 2016)

It was a two-month-summer-job. The aim was to develop a group management software.
After that, I've developed a kind of query builder in **ASP**. The aim was to ease people from a company to facilitate the way they analyze their outcomes without any knowledge of **SQL**.

Student Seller – SportsDirect (Summer 2016)

This experience allowed me to meet persons and to **improve my soft skills**. Indeed, I have done this job in order to work in a team and to **share my knowledge** about sport. This is an important thing to me.
